

New Switching Plant Installed

Wave 9 Aug 1984

MIDWAY-Heber Light and Power and Utah Light and Power, worked last week together installing a new switching station which will eliviate single phasing.

Heber Light and Power Director Ray Farrell, said that the new switch will cut in when there is a loss in one of the legs.

This will provide a more reliable system for all customers. The system eliminates fuses, which brought in back up power from Utah Power and Light. The new switch kicks in when there is a loss in power.

Both Heber and UP&L crews worked side by side to connect the new switch. The final connection was made Friday morning.

Page Zobell and Rafe Black, of Utah Power and Light Engineering office, check over the new switch with Ray Farrell, Manager of Heber Light and Power, before the power to the switch is turned on.
